Thursday night

1953

Josh -

The pleasure one derives from seeing a
rapior handled well gets one over all sorts
& depressed thoughts. This was a rare
intellectual treat and, incidentally,
a great didactic success.

Thanks for the favor

Gerhard

P.S. I do hope Sigma Xi persuades you to
go on a lecture circuit. When they do, please
let me know when you talk in N.Y. and
Cambridge, Mass. A few of my friends
here, light scatterers and other chemical
physicists would lap up this lecture.
